Stay Steady in Uncertain Times

Hello Rebecca,

It's been an eventful few days. Between the global IT outage last week, to the U.S. political events of the weekend, you may be wondering what to do in the face of this upheaval.

Political shocks do have the potential to rattle markets and can make you anxious about your portfolio. However, it's crucial to remember that market volatility is normal and often short-lived. Your long-term financial goals should remain your primary focus, not day-to-day market fluctuations.

Reacting emotionally to political events and market swings can lead to poor investment decisions. If your financial goals and risk tolerance haven't changed, neither should your investment strategy. Consider this volatility an opportunity to reassess your asset allocation and potentially rebalance your portfolio. But remember, historically, markets have always recovered and trended upward over time.

I encourage you to read the articles below for more insights on navigating the current uncertainty. If you find them helpful, please share them with friends and family who might benefit from this information. As always, I'm here to discuss your specific financial situation and help you stay on track towards your goals.
